

Please reject the NAB's petition 04-160. I love XM Satellite Radio. I prefer it over FM stations. I had my car at the mechanic garage for over a week and I realized how much I missed XM Satellite Radio. I get a huge variety of channels. I am always listening to new music. FM stations either play the same music over and over and over (I think you get the point) or run several commercials. I cannot remember the last time I listened to FM stations in my car. I would be highly upset if I was not allowed to have the option of listening to XM Satellite Radio.
